## **DETAILED ACTION**

### ***Claim Objections***

Claims 1,2, 9, and 10 are objected to because of the following informalities:  
Throughout claims 1,2, 9 and 10 the word “stretching” is mis-spelled. IT is also suggested that all of the claims be reviewed for such errors.. Appropriate correction is required.

Also in claim 1 it is suggested that the term “both” be inserted before “ left” in line 7 so that it is understood that the tightening portion extends in two ways, both left and right. IT may also be inserted before “left” in the next line and remove “the” at the end of line 7 So that it is clear that the tightening portion extends over both the left and right buttocks and that it is a single portion of the tightening portion. As written it is somewhat confusing that it is a single band that goes in both the left and right directions from the center at the anal cleft.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 3765

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-26 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/596040. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim the same crotch possessing corrective garment with the tightening portion over the buttocks area and the left and right greater trochanters wherein the tightening force varies along the area.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and upon receipt of a proper Terminal Disclaimer as discussed above.

### ***Response to Arguments***

Applicant's arguments, see response, filed 8-5-08, with respect to the prior art rejection have been fully considered and are persuasive in light of the claim amendments. The prior art rejection of 2-5-08 has been withdrawn.
